

THANK YOU AND MERRY CHRISTMAS!

Another summer has come and gone. With the Holiday season and winter weather fast approaching, **Ressler Propane** is geared up to serve our customers! We consider it a privilege to serve so many good people in our own communities and neighborhoods.

Having such an excellent product such as propane to offer our customers is an exciting thing. Propane is a desirable fuel for many reasons:

1. Propane is clean burning
2. Propane is efficient
3. Propane is safe (See enclosed brochure)
4. Propane is economical
5. Propane is portable
6. Propane is useful in multiple applications (Furnaces, Boilers, Water Heaters, Clothes Dryers, Cooking, Fireplaces, Generators, Outdoor Grills, Fire Pits, Pool Heaters....and more!)
7. Best of all, Propane is a LOCAL Pennsylvania Product!

If you are looking to build a new home, add or replace appliances in your current home, we hope you will consider using propane for its useful benefits. The highly experienced staff at **Ressler Propane** would love to assist you in making the best decision for your family's needs.

Please accept this 2020 inspirational calendar on behalf of all of us at **Ressler Propane**.

We pray that you and your family have a blessed Thanksgiving and Christmas, good health and a prosperous New Year.

With Warm Regards To All

Bryce Ressler

With the rainy spring and summer season behind us, it's time to think of the next seasonal precipitation – snow! Cold weather is on our doorstep and we will be spending more time inside our homes. **Ressler Propane** reminds you to be prepared for the weather conditions to come.

- Please keep your driveway clear of snow and ice, especially when accessibility to the propane tank requires our trucks to use your driveway.
- If heavy snow is predicted—please mark underground propane tanks with a flag or stake to mark the location under drifting snow.
- Please keep vents and chimney flues clear of snow and ice.
- If your propane usage is sporadic, please check your propane tank gauge on a regular basis and remember to call if you see that the level in your tank is 30% or below.
- When using a propane powered generator, please contact our office if the generator has been operating continuously for 24 hours or more and provide the current gauge reading. We will attempt to prioritize urgent deliveries, weather permitting.
- As always, please call our office immediately if you suspect a gas leak.
- REMINDER!!! Please do not attempt to heat your home using portable heaters, grills or other outdoor only appliances. Only use equipment specifically designed and approved for indoor use.
